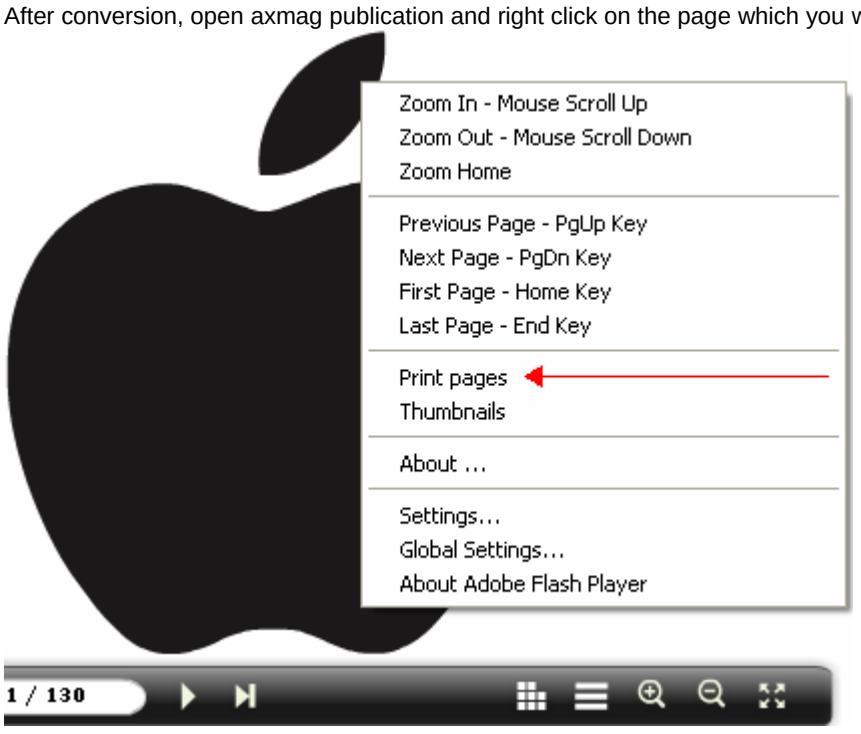
Save the setting.xml in Notepad then go open index.html, this time you can click on the button to download the correct PDF file now:

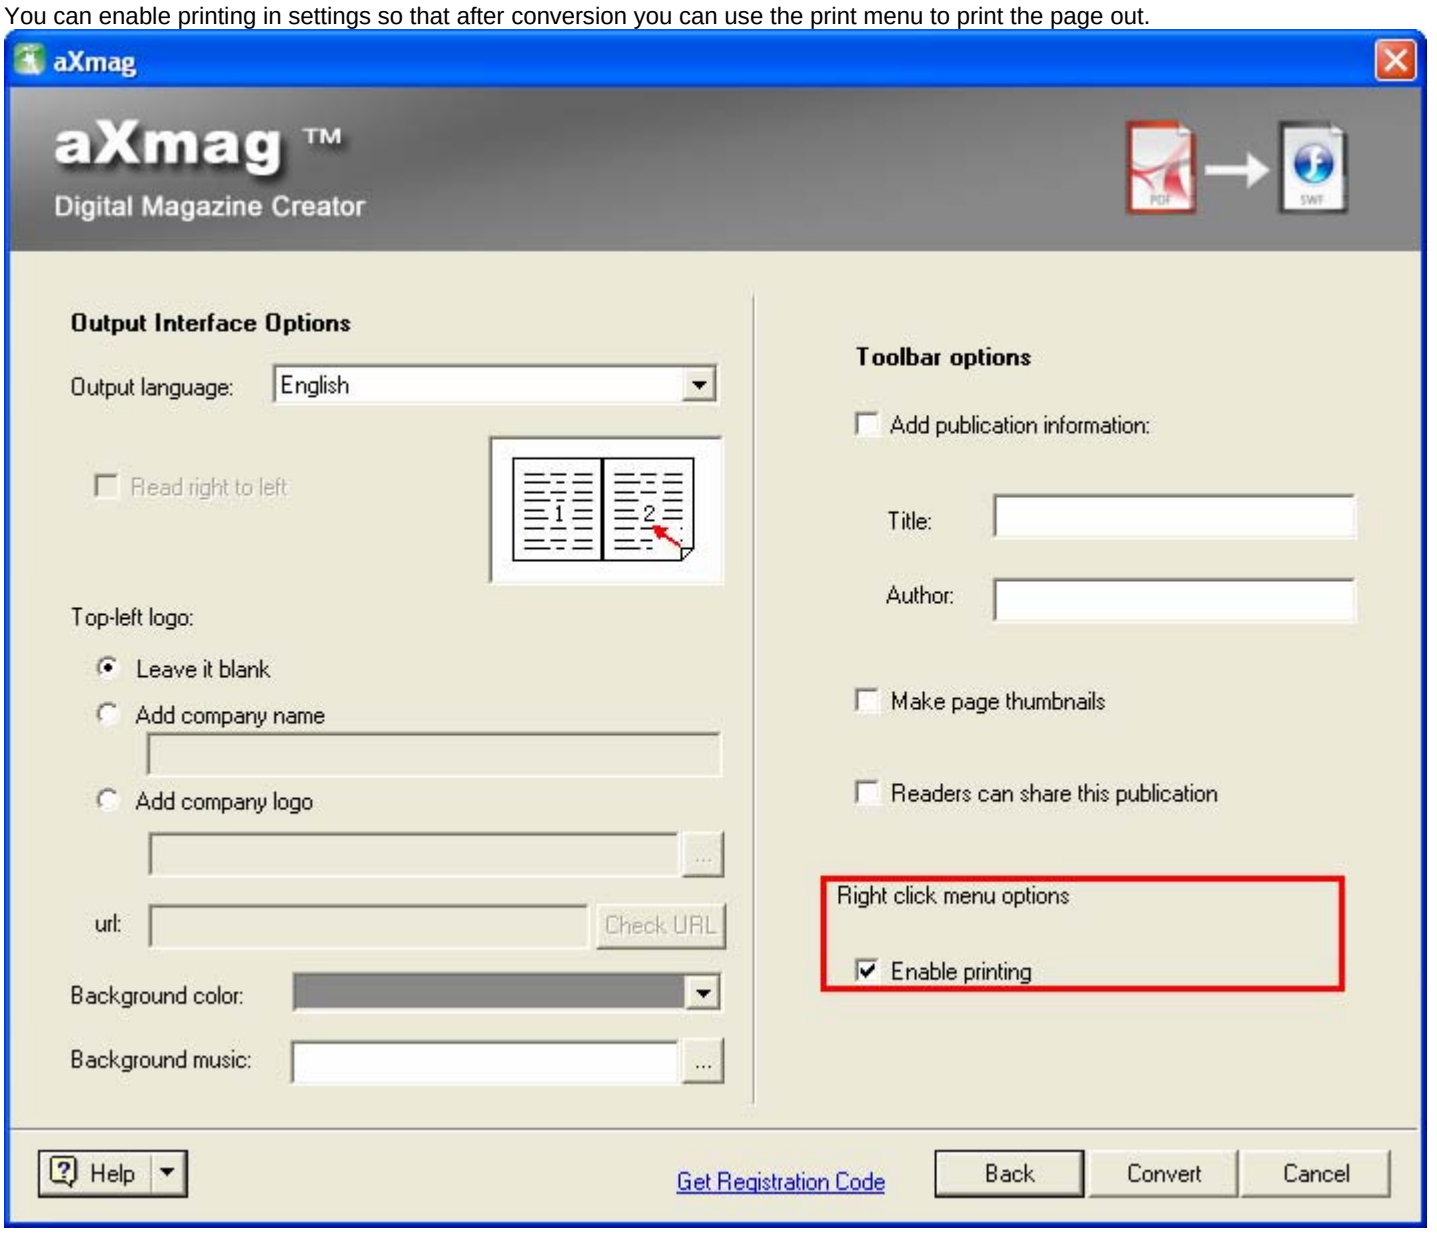
Please make sure to upload the whole publication to your server then test the link, for more information about testing the links locally, please refer to: http://www.axmag.com/manual/PC/Print_Save.htm

- **Print Pages**

After conversion, open axmag publication and right click on the page which you want to print, find "Print pages" and click it to continue:



You can enable printing in settings so that after conversion you can use the print menu to print the page out.



Important:

The functioned print feature is printing the SWF pages but not the real PDF pages, in this case It is suggested to download the PDF instead of printing SWF pages so that you can get the best layout from original PDF.
